

THEMES

- Recycling and Reuse
- Making Responsible Choices
- Caring for the Environment
- Everyday Actions Matter
- Materials and Change

EYFS FRAMEWORK LINKS

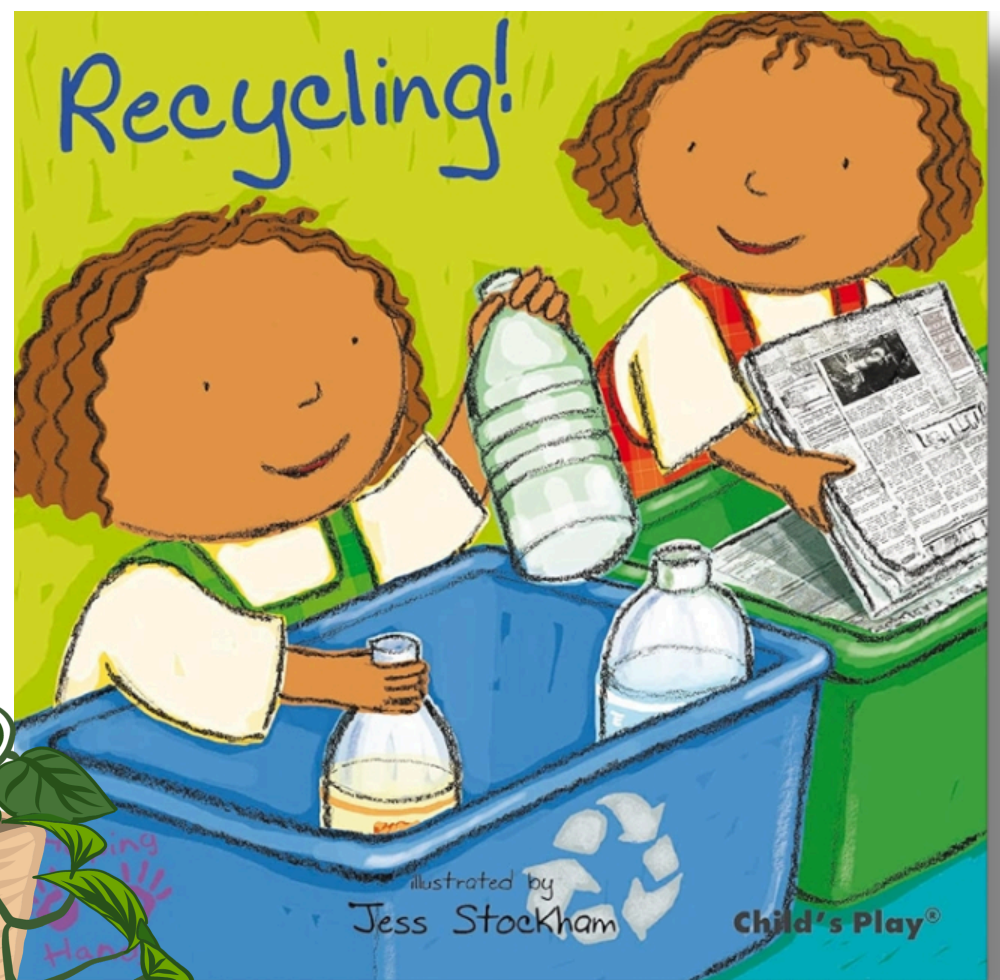

- Understanding the World
- Communication and Language
- PSED
- Expressive Arts and Design

PRE READING QUESTIONS

- What does recycling mean?
- What do we recycle in our classroom or at home?
- What do you think happens to rubbish after we put it in the recycling bin?

DISCUSSION QUESTIONS

- Which items in the book can be recycled?
- Why is recycling helpful for the planet?
- What can we do every day to reduce waste and recycle more?
- What materials were recycled?

RECYCLING

By Jess Stockham

Recycling introduces children to what recycling is and why it is important. The book explains what happens to everyday items such as paper, plastic, glass, metal, and food waste when they are recycled. Through simple explanations and child friendly illustrations, children learn that rubbish does not always have to be thrown away and that many items can be turned into something new. The book supports children in understanding the sorting and recycling of materials as an everyday action that helps care for the environment.
