

THEMES

- Recycling Materials
- Sorting and Making Choices
- Looking After the Environment
- Responsibility and Routine
- Materials and Change

EYFS FRAMEWORK LINKS

- Understanding the World
- Communication and Language
- PSED
- Expressive Arts and Design

PRE READING QUESTIONS

- What do you know about recycling?
- Do you have recycling bins at home or at school?
- What kinds of things do you think can be recycled?

DISCUSSION QUESTIONS

- What happened to the rubbish on recycling day?
- Why is recycling better than throwing everything away?
- How can we help with recycling in our classroom or at home?

RECYCLING DAY

By Edward Miller

Recycling Day follows a group of children as they learn what happens to their rubbish on recycling day. They explore different materials such as paper, plastic, glass and metal, and discover how these materials can be sorted, collected, turned into something new, and used again instead of being thrown away. The story introduces recycling as a helpful routine that everyone can take part in to care for the environment.
