1. NORTH LONDON WASTE AUTHORITY

- 1.1 North London Waste Authority (NLWA) is the statutory waste disposal authority for the north London area covering the seven boroughs Barnet, Camden, Enfield, Hackney, Haringey, Islington and Waltham Forest (the Boroughs). We manage waste transportation and disposal on behalf of seven London boroughs in the north London area. We also manage the recycling collected by six of the seven boroughs, which all collect the same range of materials. The current recycling rate for the NLWA area is 28.9% (2019-20)¹.
- 1.2 Our aim is to preserve the resources and the environment today and for future generations. We are committed to innovation and careful planning to ensure we manage waste resources effectively and sustainably. We work with residents, schools and businesses in north London to promote waste minimisation and recycling to preserve resources and reduce the amount of waste that has to be disposed of.
- 1.3 Waste disposal services are mostly delivered through a contract with LondonEnergy Ltd - a company which is owned by NLWA. We also manage seven household waste recycling centres on behalf of the boroughs.
- 1.4 [The North London Joint Waste Strategy \(NLJWS\)](#) provides the strategic framework for municipal waste management in north London for the period 2004 to 2020. The NLJWS sets out the targets for reducing, reusing and recovering a greater proportion of the municipal waste generated in the NLWA area and for reducing the amount which is sent for disposal to landfill. The NLJWS sets out how waste will be managed in line with the waste hierarchy.
- 1.5 Implementing the strategy involves working in partnership as local authorities and with local communities to provide the services and facilities required to make the improvements we need at the most efficient scale of operation and finance. This involves action and investment in waste minimisation, recycling and composting and recovering energy from waste.
- 1.6 The first draft of the NLJWS was published in 2004 (Mayor's Draft, September 2004) but was subsequently updated and subjected to a new [Strategic Environmental Assessment](#) or SEA in 2008 before final adoption in 2009.
- 1.7 A key element of the strategy has been addressed through the achievement of a Development Consent Order for the construction and use of a replacement energy recovery facility at the Edmonton EcoPark, planned to be in place from 2025, to treat all the residual locally collected waste.
- 1.8 Work has started on a replacement Joint Waste Strategy and will progressed as the central government approach to the circular economy and to the encouragement of recycling is essential to support enforcement.
- 1.9 The new Joint Waste Strategy will focus on activities to move all waste up the waste hierarchy. In the short term, a Residual Waste Reduction Plan has been agreed after consultation with constituent boroughs. This Plan forms a short-term strategic approach from NLWA, which will inform the development of the next Joint Waste Strategy.

- 1.10 The [Residual Waste Reduction Plan](http://nlwa.gov.uk/media/2811/09-residual-waste-reduction-plan-2020-22.pdf) is NLWA's plan to help north London residents reduce their consumption-based emissions in the face of the Climate Emergency. The Plan covers a period of two years, with the possibility of extension for a further year. It includes waste prevention activity and communications work delivered by NLWA to reduce the level of recycling contamination and increase recycling, supporting on-the-ground activity delivered by the constituent boroughs. The Plan delivers some of the activities included within borough Reduction and Recycling Plans (RRPs) required by the Mayor of the London. The Plan can be found at: <http://nlwa.gov.uk/media/2811/09-residual-waste-reduction-plan-2020-22.pdf>

2. WASTE PREVENTION COMMUNITY FUND PROGRAMME

- 2.1 NLWA has established a fund to support waste prevention initiatives in the north London area to complement its current waste prevention programme with the aim of extending the reach and impact of waste prevention activity in north London by supporting a wide range of community-based organisations. The total amount available for 2021-22 is **£60,000**.

- 2.2 The NLWA Waste Prevention Community Fund (the Fund) is a funding mechanism which considers proposals for waste prevention projects from not-for-profit organisations that wish to develop new approaches to tackling waste prevention.

3. TYPES OF FUNDING

- 3.1 The funding is available for projects **up to £15,000** and preference will be given to projects that focus on electrical repair and reuse, food waste, furniture and textiles and single use plastics.

- 3.2 Recently funded projects include:

- 'Street Store' from Hubbub: Street Store was a community clothes swap, a popup space that enabled north London residents to swap outgrown clothing for new items with other residents, find information on how to take better care of their clothing and find out about local textiles banks. Street Store also featured a clothing swap area, a 'Street Store' pilot toolkit (a set of materials which enable each of the communities to roll out and adapt the pop-up space to meet their needs), take-away materials that support residents to take better care of their clothing and textiles recycling banks.
- 'The Electrical Repair Directory' produced by The Restart Project: The Repair Directory is an online database with a mapping and search facility aimed at members of the public looking for reliable repair businesses in their area. The aim was to prevent Waste Electrical and Electronic Equipment (WEEE) by encouraging use of reliable commercial repairers and donations of WEEE for reuse.
- 'Sustainable Threads', a project of the London Community Resource Network: The London Community Resource Network (LCRN) received funding to promote textile reuse and repair by developing a network of clothing repair specialists and host a working group to look at how to increase textile repair and reuse resources to encourage higher public awareness around textiles waste.
- 'Cirque de Surplus' by This is Rubbish: This is Rubbish (TiR) was funded to deliver participatory performances and informative plays at seven, mainly outdoor, events across north London between June and December 2018 to raise awareness about food waste reduction. The project included direct face to face engagement with active participation of residents in activities under the Cirque de Surplus banner, indirect

engagement through promotion via social media and innovative activities based on previous work at north London festivals.

- 'Waste Warriors', schools workshops delivered by BreadnButter: The aim of the project was to help children and their families understand how they could live more sustainably and save money by wasting less food and by increasing recycling and reuse of certain materials, in particular plastic. The project delivered a five-week programme to primary school pupils in schools in Barnet and Enfield and also included four community fridges, which alongside the workshops, allowed families of school children to share food.
- Food Waste Cooking Club Socials and Clothing Swaps delivered by Life After Hummus: Life After Hummus received funding to deliver 14 Food Waste Cooking Club Socials and four London Clothing Swap events across north London aiming to engage residents in food waste prevention and textiles waste reduction respectively. The project involved hands-on nutrition and cooking classes, namely Food Waste Cooking Club Socials for the local community.
- The Loop@Grahame Park delivered by Groundwork London: Groundwork London is delivering the Loop@Grahame Park project aiming to reduce the collection of local authority waste by running a training programme to increase the ability of residents to support their furniture and electrical reuse service on the Grahame Park estate in Barnet. The Loop is a reuse 'hub' out of which dedicated staff and residents run an electrical items and furniture collection and re-sale service. The Loop not only directly reduces items entering the waste stream by collecting unwanted items from local households and from fly-tipping locations, but also engages with local residents and has been shown to change peoples' understanding and behaviour in relation to waste generation. It thereby has a two-fold impact on local authority waste arisings.

3.3 The grant of any funding by NLWA would require a Funding Agreement to be entered into with the successful applicants, which would include relevant terms including the expected activity and reporting. The Terms and Conditions of the Funding Agreement can be found in Appendix 1.

4. ELIGIBLE PROJECTS

4.1 In order to be eligible for funding **all the following** must apply:

- 4.1.2 Proposed projects must **reduce local authority collected waste arisings** (waste collected by one or more of the Boroughs);
- 4.1.3 Only **one proposal** must be submitted by an organisation in each round of funding (please see sections 10.2 and 12 of this guidance);
- 4.1.4 Organisations that were either successful or unsuccessful organisations in previous rounds of funding are eligible to apply in this round, too; and

These groups may either be incorporated or unincorporated provided that the person signing is authorised to do so. Evidence of such authorisation must be submitted with the funding application.
- 4.3 As detailed at paragraph 3.3, successful applicants will need to enter into a Funding Agreement and payment will be made to a bank account designated to that organisation. Where a consortium applies and is successful, each member of the consortium will be required to sign the Funding Agreement.
- 4.4 Previous Fund applicants may apply irrespective of whether they were successfully funded or not in a previous year, taking into account the other funding criteria listed in this Section 4. NLWA reserves the right to disqualify any applicants whose contract has been terminated by NLWA for non-performance.
- 4.5 Types of eligible projects – funding applications can take any of the following forms:

NLWA must receive evidence of any co-funding arrangements within five working days of the notification of provisional award for funding (provisional award letter). Failure to provide such evidence will result in the funding from NLWA being withdrawn in full. NLWA will not make any payment of the funding amount prior to the receipt of such evidence of co-funding arrangements.
- 4.5.4 **Can be for goods or for the cost of an activity** provided that it can be successfully shown to tackle a waste prevention problem for the waste streams identified by NLWA.
- 4.5.5 Organisations can apply for either **part-funding or full funding** for their project.
